I get: [01.10.2017 13:41:05 UTC] Value cannot be null. Parameter name: source Exception of type 'System.InvalidOperationException' was thrown. The exception message says that I should use CODEX instead of ZIP but in the documentation the user will not have any of those options, they are only available for VSTO projects. A: I am going to answer my own question, I was able to find the answer to this issue, please note that this is a small hack and do not ask me about its legality or you will get banned in the quick. But I think you can use this solution at least for the time being. Open the ZIP file for the project, for example with 7zip. Select the file Dragb2x.vsct Copy it somewhere Uninstall the VS 2017 Team Explorer from your PC Now you are going to use the following command with the part after the.. Dragb2x.vsct 2017/10.01/1.0 Copy and paste these lines to the VS2017 command prompt and press enter. cd. 7za e Dragb2x.vsct Start VS 2017, your project should now open.

An experimental model of renal failure after 30 days of obstructive jaundice in rats. To analyze the mechanism of renal dysfunction due to prolonged obstruction of bile flow, rats were subjected to 30 days of bile duct ligation (BDL) or were sham-operated. Body weight, serum creatinine, glomerular filtration rate (GFR) and intrarenal distribution of blood flow were determined at 1, 2, 4, 12 and 24 weeks after surgery. At 4 weeks, there was an increase in serum creatinine and a decrease in GFR compared with the sham-operated group. The mean arterial pressure (MAP) also was elevated at 4 weeks and gradually increased. At 12 weeks, the serum creatinine and MAP were similar to the sham-operated group. The decrease in GFR at 4 weeks was due to a decreased renal blood flow (RBF) and an increased glomerular vascular resistance (GVR). At 12 weeks after BDL, the GFR decreased more than 1 week after the BDL procedure, and the RBF and GVR were similar to the sham-operated group.

Renal pathology confirmed
